

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

MEMORANDUM.

THE present volume contains an abstract of the data contributed by the under-noted Assurance Companies from their own records, in respect of their experience of the mortality amongst Female Lives assured under Whole-Life Assurance policies on Single Lives, with premiums payable uniformly throughout life. The period of observation extends from 1863 to 1893.

COMPANIES CONTRIBUTING THEIR ASSURANCE EXPERIENCE.

SCOTTISH AMICABLE.	STANDARD.

* These Companies contributed, through the Institute and the Faculty, the business transacted in their chief offices in England and Scotland respectively.

Particulars of the several assurances current at the commencement of the observations, or subsequently effected up to the close of the period, were supplied upon separate cards, the total number of which was found to be 49,142 for Participating, and 13,220 for Non-Participating Assurances.

On pages vi to viii are furnished Summary statements of the totals shown by each of the classifications into which the data were grouped ; also a general comparison of the data with those included in the Institute (H^F) Experience 1863.

The cases referred to as "Old" Assurances are those which were effected prior to 1st January 1863, and brought under observation at their policy-anniversaries in that year. "New" Assurances are those which were effected between 1st January 1863 and 31st December 1892. "Combined" Assurances are "Old" Assurances and "New" Assurances taken together, without reference to the dates of the policies. "Select Tables" are those in which the lives are separately classified under each of the ages at which the assurances were effected. "Aggregate Tables" are those in which the data are grouped together for each year of age during which the lives were under observation, irrespective of the duration of assurance.

As duplicate periods of risk were eliminated independently for Select Tables and for Aggregate Tables, the totals under each of these classifications are not identical.

The data in respect of Participating and Non-Participating Assurances have been throughout separately tabulated, the latter in a somewhat condensed form.

In the tabulation of the data, the nearest integral age at date of assurance was assumed to be, on the average, the exact age at entry, and the assurance year—that is, the year commencing on the date, or on the anniversary of the date, of assurance—was adopted as the year of exposure to observation. Thus, opposite "Years elapsed since date of Assurance 0", are recorded the numbers exposed to risk for the first twelve months of assurance, and also the deaths which occurred during that time; opposite "Years elapsed since date of Assurance 1", are shown the numbers exposed to risk for the second full year of assurance, commencing on the first anniversary of the date of assurance, and the deaths during that year; and so on.

The Withdrawals were assumed to pass out of observation, either at the commencement, or at the end, of the year of

assurance in which they occurred, and were tabulated by the application of a modification of the Nearest Duration Method, in such a way that effect was given to their actual time of exposure within such year. The days of grace allowed for payment of the premium were included in the period of observation.

The durations, as tabulated, of the cases of Withdrawal, were thus throughout integral; and as the observation of cases "Existing" ceased on the policy-anniversaries in 1893, there are no fractional years of exposure.

It is believed that the headings of the various Tables are sufficiently clear to afford a full description of their contents.

An account of the processes and of the precautions devised to ensure accuracy in the scheduling, also of the various methods employed throughout the investigation in eliminating the duplicates, in dealing with defective information, and in deducing the numbers exposed to risk, with the resulting rates, is in course of preparation.

It is trusted that it will be sufficient, for the present, to state that very scrupulous care and supervision have been exercised at every stage and in all departments of the investigation, and that the working methods and processes received the personal consideration and approval of the Committee.

The tabulations and the entire clerical work were executed by a special day staff, under the superintendence of Mr. T. G. Ackland, F.I.A., to whose devoted attention the Committee again gladly bear testimony.

C. D. HIGHAM,

President of the Institute of Actuaries.

GEO. M. LOW,

*President of the Faculty of Actuaries in
Scotland.*

30th November, 1900.

* EXAMPLE.—Let $\theta_{[x]+t}$ = the cases "Died" having a curtate duration of t years since date of assurance, that is to say, during the currency of the $(t+1)$ th year; and let $E_{[x]+t}$ = the Number "Exposed to Risk" in the $(t+1)$ th year following date of assurance:—

then, for the group of ages at date of assurance 35-39, we have for the probability after the expiration of four years from the date of assurance:—

$$\begin{aligned}
 q_{[35] \dots [39]+4} &= \frac{\theta_{[35]+4} + \theta_{[36]+4} + \theta_{[37]+4} + \theta_{[38]+4} + \theta_{[39]+4}}{E_{[35]+4} + E_{[36]+4} + E_{[37]+4} + E_{[38]+4} + E_{[39]+4}} \\
 &= \frac{10 + 12 + 6 + 5 + 7}{712 + 680 + 677 + 701 + 705} = \frac{40}{3475} \\
 &= \cdot 01151, \text{ as tabulated above.}
 \end{aligned}$$

Note on next page.)

NOTE.

The data as to Withdrawals tabulated on pages 156 to 159 are set out at grouped ages in respect of Combined "Old" and "New" Assurances. The sum of the "Aggregate Fractional Exposures" (col. 7) for $(t-1)$ years elapsed since date of assurance, and of the "Balance" (col. 8) for t years elapsed, as ascertained separately for "Old" and "New" Assurances, and in respect of each age at date of assurance, is tabulated at the appropriate ages on pages 2 to 114 inclusive, as "Withdrawals" at t years elapsed since date of assurance.

EXAMPLE.—Grouped Ages at date of assurance, 58 to 62.

"Aggregate Fractional Exposures" (col. 7) after 2 years elapsed = 12
 "Balance" (col. 8) „ 3 „ „ = 24
